International Conference on 3D Vision  
Online, December 1-3, 2021

## 3DV 2021 Conference Sponsorship

An invitation to participate in the 9<sup>th</sup> International Conference on 3D Vision (3DV 2021), which will be held online from December 1–3, 2021.

3DV is an annual conference providing a premier platform for researchers, developers, and practitioners to present and discuss a broad variety of topics in the area of 3D research. 3D information has been more accessible and the interest in 3D information processing continues to grow. The topics include, but are not limited to, 3D information processing in computer vision and graphics, such as novel sensors, signal processing, geometric modelling, representation and transmission, visualization and interaction, machine learning applied to 3D, and a variety of applications in different fields.

Given the ongoing uncertainty due to the COVID-19 pandemic, and particularly regarding international travel restrictions, 3DV will be moving to a fully online format. The live online event will take place on December 1–3, 2021.

We invite you to consider becoming a sponsor and/or exhibitor at this event and to take a look at the wide range of options we have available for your consideration. Please join us online to enjoy this prestigious event and connect with its attendees. We look forward to welcoming you in December 2021.

## About the conference programme

The conference will start on Wednesday, 1 December 2021 and will conclude on Friday, 3 December 2021. The program will include invited Keynote speakers, displays, paper and poster presentations, as well as demonstrations and industry sessions.

## Benefits for exhibitors

Stand out from the competition and benefit from this unique opportunity to meet with more than 400 academic researchers, students, and scientists from around the world who conduct research on 3D vision, graphics, machine learning, and virtual/augmented/mixed reality.

- Networking with prospective employees on the virtual conference platform.
- A single place to keep up-to-date with new trends in 3D vision and related topics.
- The top-rated technical program draws attendees from around the world.
- High-visibility video exhibits for showcasing your latest products and services.
